INTRODUCTION 01

SERVICES 02

- Fabrication
- Machining
- Boilermaking
- Plant Fabrication
- Cold Conveyor Belt Splicing
- Rubber Lining
- Screen Site Liners
- Pulley Lagging
- Spray Painting & Sandblasting
- Mining Equipment Refurbishment
- Fabrication of Idlers & Pulleys
- Ceramic Tiling
- Specialized Welding
- On-site Fabrication & Maintenance

PROJECT GALLERY 06

At Madge Engineering, we don't just complete projects; we elevate them! Our unwavering commitment to exceptional customer service and professionalism ensures that every detail is handled with the utmost care. Together, let's bring your vision to life!

- Emily Mnguni
Director

INTRODUCTION

Madge Engineering cc was registered in 2007 & is 51% Black Female Owned B-BBEE Level 2 Contributor. Our company focuses on offering the mining, civil, construction & industrial sectors with quality fabrication and engineering solutions.

Our core business traditionally has been to provide pulley lagging, ceramic tiling, rubber lining, welding & reconditioning of machinery / machine parts.

Based on client requirements, we expanded our scope to include a quality idler fabrication plant, plasma cutting and profiling division as well as sandblasting services which form part of our vision to be a complete service provider satisfying & exceeding the client's needs.

Madge Engineering has always been at the forefront of industry trends, constantly pushing boundaries to deliver exceptional results for our clients. From innovative design concepts to cutting-edge technology, we are committed to setting new standards in the field. If you grow, Madge Engineering grows.

- Herman Oosthuizen
Director (Technical)

DEDICATED TO OUR CUSTOMERS

At Madge Engineering, we recognize that downtime means loss of productivity & costs you money.

From a breakdown perspective, our field service division can get your plant and / or machinery up and running as quickly as possible, 365 days a year. We can also provide routine preventative maintenance as directed or can work with you to create a new asset management schedule to assist in minimizing untimely breakdowns.

HEALTH & SAFETY

To ensure all our employees are fit for work on-site, we have ensured that each individual has a passed their medicals to confirm that they are medically fit & able to complete the job on hand. We also strictly adhere to all Health & Safety Regulations.

WHAT DOES MADGE ENGINEERING OFFER TO YOUR COMPANY?

“

Madge Engineering is making waves with their unwavering commitment to taking on any project, big or small, with skill and expertise. From across-the-border endeavors to local projects, our team is a force to be reckoned with.

- Katrien Bird
Director (Financial)

FABRICATION

We offer a turnkey fabrication service that provides the best engineered solutions to the most challenging and complex engineering feats. We further offer on-site fabrication and maintenance.

MACHINING

Madge Engineering offers fast, reliable, and cost-efficient machining services with flexible size ranges. This comprises a range of CNC and conventional machines that cover all facets of manufacturing and machining.

BOILERMAKING

Expert boilermaking services for the manufacturing, engineering, mining, construction and civil sectors.

PLANT FABRICATION

Precision custom fabrication that you can trust. Our expert custom plant fabrication ensures that innovative solutions are found for your project and complemented with reliable craftsmanship.

COLD BELT SPLICING

Madge Engineering offers cold conveyor belt splicing as a cost-effective solution for enhancing conveyor belt performance. Services are carried out in-house and on-site, significantly maximizing uptime.

RUBBER LINING

Rubber lining offers your plant and storage tanks dependable and long-term protection. Linatex rubber is renowned for reducing long term wear caused by fine particles, including the wet and abrasive conditions in mining.

Ideal for Vibe Screens, Underpans and Volume Tanks.

SCREEN SITE LINERS

When installed on the vibrating screen where highly abrasive rocks slide, screens that have been lined with Linatex lasts twice as long.

PULLEY LAGGING

Maximum performance lagging for drive pulleys in medium to heavy duty applications, high traction, anti-resonance and anti-vibration design.

Flameproof and Non-flameproof •
Ceramic Pulley Lagging

SANDBLASTING & SPRAY PAINTING

Main focus on stripping away old finishes, rust, and contaminants through sandblasting and applying fresh, durable coatings through spray painting.

MINING EQUIPMENT REFURBISHMENT

We offer a full range of maintenance services for mining equipment and repairs. From reconstructing surfaces to full rebuilds of large components.

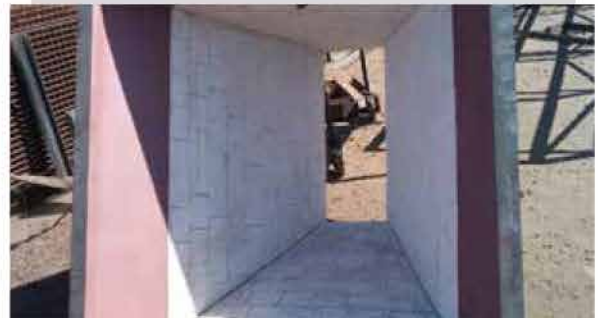

FABRICATION OF IDLERS & PULLEYS

Our in-house idler manufacturing facility provides high quality conveyor idler rollers, frames and conveyor pulleys.

CERAMIC TILING

Wear resistant lining is used to enhance the mechanical, pneumatic and hydraulic conveyance of highly abrasive materials.

SPECIALIZED WELDING

Argon Welding • CO₂ Welding • Stick Welding • Aluminum Welding • Pulse Welding • Negative & Current Welding • Mild Steel & Stainless Steel Welding

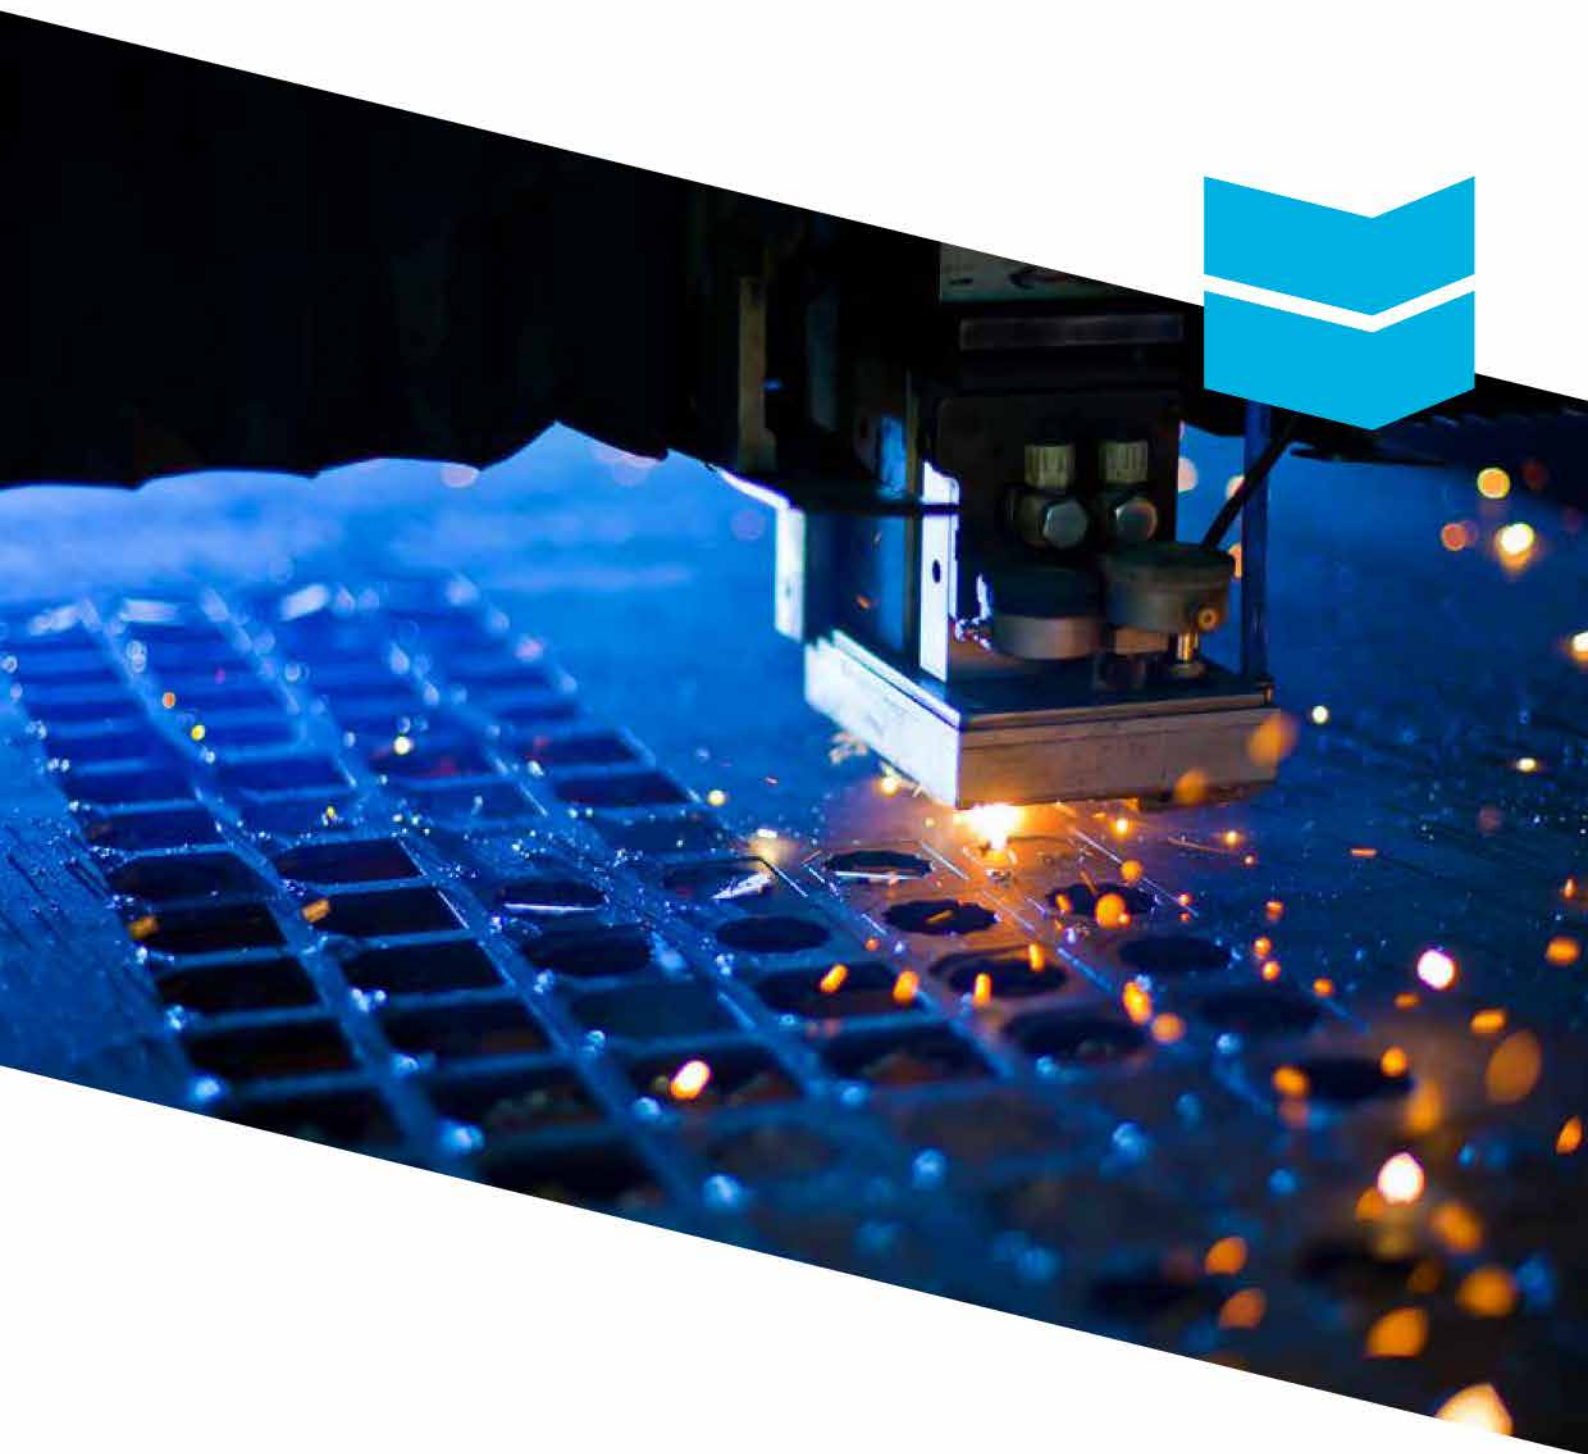

ON-SITE FABRICATION & MAINTENANCE
